

I Live in Swanzey, NH, just outside of Keene. Which is in a valley, and the Cellular Providers are US Cellular & UniceL.

When you read the advertisements for service from Verizon, Cingular & ATT with pricing packages that are much lower and with the latest the ability to use your Cell Phone in Europe. I think it is time for the Government to change too allow customer to shop and by where and from whom for the service, (such as if I can get a better rate from a provider in Mass or in another part of the state say Manchester, that I be allowed to do so.

PS. I use Verizon for my Local and Long distant Phone service, plus the DSL.

I would like to have one service provider for all my needs.

My Cell, provider is US Cellular but would like to have Verizon.

Thanks Clifford Simonds
